

## Boom Aerial Theory

This course will provide the participant with the necessary theoretical knowledge of proper aerial boom lift operation. It is the first part of a two-part requirement to become a qualified boom work platform operator.

### Participants will:

- Become familiar with legal requirements set out in the Occupational Health and Safety Act and applicable Regulations for Industrial Establishments.
- Read and understand all limitations, warnings and operating procedures and operator's responsibilities for maintenance of the equipment.
- Understand and be familiar with the Operating Maintenance and Parts Manual and Operator's Manual provided by the manufacturer for the specific make and model he or she will be using.

Method of Instruction: Interactive presentation, group discussion and video(s).

Who Should Attend: Leadership positions and Employees who are required to operate elevated boom platforms.

Course Length: 2 hours.

- Course materials and certificates provided.
