

Audits, Inspections and Training Since 1996

Gambit Industrial Health and Safety Consultants Inc.

Part Two Certification Common Office Hazards

Certification training is the law. The 1990 amendments to the Occupational Health and Safety Act require virtually all Ontario workplaces with 20 or more employees to establish joint health and safety committees. At least two committee members, one representing the employer and one representing the workers, must be certified through an approved WSIB Certification program.

Part Two; Office Sector Common Hazards focuses on significant hazards common to offices. The goal is to assist employees in the office sectors that have completed Basic Certification Part One to complete Part Two Certification. In one day of in-class training, participants will learn about common office hazards and how these can be recognized, assessed and controlled. Our course has been developed to include 5 self-standing modules that meet the objectives set by the WSIB for sector-specific common hazard training.

The modules covered are:

1. Ergonomics
2. Chemical Safety
3. Manual Materials Handling
4. Walking and Working Surfaces
5. Workplace Violence

Course length:

- 7 hours
- 8:30am to 4:30pm (1 hour lunch)
